Personal Profile

I am a recent graduate from the University of Bristol in Environmental Geoscience (MSci). My passion for the earth sciences has grown throughout my years in education. My studies have taken me around the UK, and further afield to Tenerife and Iceland. I have developed an array of self-acquired IT skills, enabling me to develop a professional website development service and assisting me in a range of scientific modelling projects. My strong creativity has enhanced these skills and allowed me to establish a professional video production service. My educational and professional activities have developed me into a confident and dedicated individual, excelling at both leading and being a part of a team. I am natively fluent in both English and French.
